

New Digital Series

Sleek Design and
Superior Detection

SHINE

SHINE

Product Highlights:

- **Sleek Design**
SHINE's glossy appearance is especially designed for apparel and other verticals where store interior is a priority. Its elegant look fits perfectly into any store design.
- **Superior Detection**
Thanks to Checkpoint's latest 3rd Generation RF-EAS technology, SHINE's superior detection performance makes it suitable for the busiest retail environment.
- **Smaller tags and labels**
Excellent detection performance allows application of integrated EAS tickets, smaller tags and labels.
- **Nontraditional Alarm**
SHINE illuminates from the base panel to send a discreet signal to alert store staff in case of a detection.

SOLUTIONS

New Digital Series

Featuring Checkpoint's patented Digital Signal Processing (DSP) technology, the SHINE antenna is your perfect choice to tackle shrinkage effectively. The application of Checkpoint's state-of-the-art 3rd Generation RF-EAS technology equips the antenna with superior detection performance, thus allowing wider aisles and applications of integrated EAS swing tickets or smaller labels. The acrylic SHINE antenna is your ultimate shrink management tool.

Technology

8.2 MHz New Digital Radio Frequency

Remote Data Analysis

When applied with CheckPro Manager, Checkpoint's renowned data analysis software, the alarm data generated from different stores can be networked and connected via internet to allow remote data analysis at a central location.

Flexible Base Covers

Base covers can easily be flipped open for access to the electronic board interface, therefore allows easy tuning with a PC or palm pilot.

Nontraditional Alarm

Works together with the buzzer alarm, the antenna illuminates from the base panel to send a discreet signal to alert store staff in case of a detection.

Strength and Impact Test

All Checkpoint's SHINE antennas have passed the strictest strength and impact test. They are engineered to withstand the rigors of retail environment.

Distributor:

RFID Option

Every antenna is upgradeable to an RFID solution.

Colors

Standard Color: clear acrylic glass with stainless steel grey metal case and a ruby red alarm lamp.

ABS base covers are also available, depending on the quantity required.

Suggested Distance Settings

The SHINE antenna has been tested to work effectively at a distance of up to 1.9m.

Specification

Acrylic dimensions:	Metal Base:
Height: 1425mm	Height: 400mm
Width: 420mm	Width: 230mm
Depth: 18mm	Depth: 100mm
Gross Weight: 25kg
