

Easy Living

HAI has developed a flexible, modular Home Automation system where you pick and choose which features you'd like in your home. Add more units and features as you need them, it's that easy!

Security Management

HAI's safety products provide the ultimate in features not found in a standard security system, including remote access and home management.

Entertainment

HAI's multi-media content in every room of your home can be controlled by web enabled devices or wireless touchscreens.

Convenient Interfaces

HAI offers many options to access and control your house's devices. Choose from touchscreens, keypads, any smart or web enabled device

UPB Lighting

Fast, flexible, 2-way lighting control where you create the perfect lighting scenes.

Energy Management

HAI is a leader in energy efficiency within the home environment by producing ways to reduce energy consumption and maximise comfort.

Access Control & Intercom

Limit and control admission to designated household areas using HAI's Access Control products.

IP Security

CCTV IP Security Cameras for any surveillance solution requirement. View, playback and controlled from anywhere in the world.

Communications & Networking

Reliability of connectivity is one of the most important aspects of any network solution, Alloys choose Cisco network products to integrate with their HAI solutions.
